

**Amendments to the Specification:**

On page 12, please replace the existing ABSTRACT OF THE DISCLOSURE with a new one that reads as follows:

--A power cord adapted for the transmission of an alternating electrical current used to power electronic devices such as, for example, audio or video devices commonly used in residential homes and commercial business is disclosed herein. In one embodiment, the power cord comprises at least first, second, and third carbon conducting wires of substantially the same length, wherein each of the at least first, second, and third carbon conducting wires has a surrounding flexible carbon material sheathing. It is believed that the carbon material sheathing mitigate radio frequency interference (RFI) and electromagnetic interference (EMI).--
